

ADIL RAFIQUE

AI Automation Specialist | Full-Stack Developer
linkedin.com/in/adil-rafique-4030841b3 | github.com/AdilDev2025

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years of experience building web applications, integrating APIs, and developing AI-agent-driven tools, including production projects using large language models. Strong fundamentals in JSON, REST APIs, webhooks, and authentication flows from day-to-day development work, with working knowledge of automation platforms (Make, Zapier, n8n) and AI coding agents (Claude Code, Cursor). Comfortable reading and troubleshooting unfamiliar codebases and integrations, and quick to pick up new tools and systems in a live production environment.

CORE COMPETENCIES

- AI Agent Workflow Automation (Make, Zapier, n8n)
 - AI Coding Agents & MCP Servers (Claude Code, Cursor)
 - API & Webhook Integration, JSON, Authentication
 - Full-Stack Web Development (MERN, Next.js)
 - GitHub-Based Development & Troubleshooting
 - Process Automation & Systems Optimization
-

PROFESSIONAL EXPERIENCE

Full-Stack Developer | DeveloperTag2024 -- Present

- Built and maintained AI-agent-driven applications, including an AI chat platform (ZenisChat) and a Solana-based AI agent tool, integrating large language model APIs into working systems.
- Developed and consumed REST APIs, handling JSON payloads and authentication flows across full-stack projects.
- Used GitHub throughout the development lifecycle -- version control, pull requests, and issue tracking -- and worked with AI coding agents (Claude Code, Cursor) as part of the development workflow.
- Troubleshoot integration issues between services and third-party tools as part of ongoing project delivery.
- Collaborated with cross-functional teams to scope technical requirements and deliver working systems on schedule.

Freelance / Remote Software Developer | Independent Contract Work, Remote Clients2021 -- 2024

- Delivered full-stack web development projects for international remote clients, working independently across the full project lifecycle from requirements to deployment.
 - Connected web applications to third-party services via REST APIs, handling authentication and data exchange.
 - Used GitHub for version control and collaborative development, managing repositories, pull requests, and issue tracking across multiple concurrent projects.
 - Adapted quickly to varied tech stacks and client requirements, building strong fundamentals in debugging and integration troubleshooting under deadline pressure.
-

TECHNICAL SKILLS

AI Coding Agents: Claude Code, Cursor (used in daily development workflow)

Integration Tools: REST APIs, Webhooks, JSON, OAuth/Authentication

Automation Platforms (working knowledge): Make, Zapier, n8n, MCP Servers

Programming / Scripting: JavaScript, Node.js, React, Next.js, Python (basic scripting)

Version Control: GitHub, Git

Other Tools: Google Workspace (Sheets, Forms, Drive)

EDUCATION

Information Technology University (ITU)

Bachelor's Degree

CERTIFICATIONS & TRAINING

- Self-directed study of AI agent workflows, no-code/low-code automation platforms (Make, Zapier, n8n), and MCP-based agent-to-repository integration
- Ongoing use of AI coding agents (Claude Code, Cursor) in real-world GitHub-based development
